

A VIRTUAL VISIT TO A FIRE STATION

CLASS II

The class excursion is a day the students look forward to. It is an exciting event for all students as learning takes place mingled with the thrill of a field trip. This year, as it was not possible to take the students for an outing, the school sought out a way to bring the expedition to the students by presenting the trip virtually. A tour of the Fire Station was conducted virtually for the students of class II on Thursday, 10th December, 2021.

The students viewed an engaging educational video in class, whereby they could virtually view, close-up, the Fire Station, its various rooms and comprehend the utility of each room. Further, the various vehicles used by the fire fighters, their components and mechanisms were explained in depth. The young viewers were awestruck and fascinated by the virtual excursion.

Admiration and respect for the fire fighters was raised considerably amongst our students. The virtual tour was insightful and interesting. It was thoroughly enjoyed by all.
