

## A Virtual Trip to the Coral Reef, Arctic World and Zoo-Class I

Every time a child thinks about a class excursion he / she is so excited. Though the pandemic created many obstacles and prevented the students from going on physical excursions, they were not disappointed and got the opportunity to experience virtual tours to places where they acquainted themselves with the world outside the online classroom. Virtual tours were conducted during the online class from 13<sup>th</sup> February to 17<sup>th</sup> February, 2022.

There were three different virtual tours organized - one was the deep amazing world of **Tubbataha coral reef** with its beautiful sea creatures. The children were mesmerized with the scenic beauty of the coral reef and the life of the sea creatures.

The second virtual tour was about the **unsung heroes of the Arctic** featuring the creatures living in the harsh cold regions of the earth. The children watched with a lot of zeal. Some children even shared their first-hand experience about snow, when they went for a holiday to a hill station.

The last virtual tour was a visit to the **Melbourne Zoo** which the class enjoyed to the fullest. They watched the different animals and their behavior in the zoo. Many of the children shared their feedback on their visit to the zoo.

The young vibrant learners were fully engrossed while viewing the virtual tour and enjoyed it thoroughly.
