

Colours make the world beautiful. They define the atmosphere, they tell what an environment looks like or should look like, they promote differentiation, uniqueness, easy identification and also help in designing.

The kindergarten days of the children are the phase when their cognitive and motor skills take shape. Developmental and interactive abilities of the children also get noticed during this age. Hence, it is very crucial for the parents at home and teachers in the school to actively engage kids in activities which boost their cognitive abilities. A lot of activities can be done in this regard and the celebration of Colors Day is one of them.

Red, the colour of blood and fire, is associated with meanings of love, sensitivity, joy, strength, leadership and determination. It symbolizes action, confidence, and courage.

The tiny tots of KG I celebrated "Red Day" on 25-5-23. The children looked stunning in their red outfits. The shades of red made the children feel bright, lively and cheerful.

All the children participated in the activities related to the colour red, sang songs and enjoyed the special assembly.
