LAUNCH OF ECO-CRAFT STUDIO

Dear Parent/Student,
Greetings from **Indian School Al Wadi Al Kabir!**

The **ISWK Eco Club** is pleased to announce the launch of the **ECO-CRAFT STUDIO**, a creative and engaging after-school programme for students of **Classes VI to XII**.

The initiative aims to nurture creativity while developing awareness about **sustainability, responsible consumption, and eco-friendly practices**. Students will learn to create useful and decorative items from recycled and reusable materials through a **multidisciplinary and vocational approach**. Activities will include paper crafts, bottle-cap planters, jute organisers, stitching, textile art, upcycling, and other creative projects. Each session will begin with a brief discussion on sustainable living, followed by guided hands-on activities.

The **ECO-CRAFT STUDIO** is aligned with **Eco Club for Mission LiFE (Lifestyle for Environment)**, **NEP 2020** and the **Sustainable Development Goals (SDGs)**, with particular emphasis on **Responsible Consumption and Production**. Through creativity and skill development, the programme seeks to encourage students to adopt environmentally responsible practices in their everyday lives.

Particulars	Details
