

**INDIAN SCHOOL AL WADI AL KABIR  
HOLIDAY HOMEWORK  
CLASS I (2018-2019)**

Dear Parents,

The summer holidays provide a welcome respite to the children and also act as a rejuvenating and revitalizing break for them. It is imperative that they use this time to relax and also pursue various creative and purposeful activities.

Here are some activities which will not only keep children occupied but also make them learn, explore, observe, concentrate, ask questions and be more confident and independent.

**ENGLISH**

- To develop the habit of reading. It is suggested that children read as many story books as they can and prepare at least one to narrate in the class.
- Children should also be encouraged to observe and read signs, hoardings, advertisements, etc. when taken outdoors.
- To enhance their vocabulary, children could be encouraged to maintain a holiday scrapbook wherein they write one new word every day and use as many words as possible in sentences of their own.

**MATHEMATICS**

Practice two sums everyday for the following number concepts till 50

- Number Names
- Missing Numerals
- Numbers Before, After, Between
- Tens & Ones
- Arranging Numbers from Small to Big

**EVS**

- Young children like to collect things such as rocks, shells, coins, pictures or toy models of plants, fruits, animals, etc. You can help children organize the collection by labelling the objects as to where they were found or who gave it to them, any characteristic feature of the object, etc.

There are many simple chores around the house that children can easily do. For instance, putting away toys after play, arranging books, organizing their rooms, etc. Besides creating awareness, this will help children to inculcate the habit of being organized.

We look forward to your co-operation in making the holidays a fruitful experience for children.

**We wish our children happy, restful and safe summer holidays.**
