SECTION A – (Reading Skills) (22 marks)

1. Read the following passage carefully:

12

1. Popcorn, also known as popping corn, is a special variety of corn. Each kernel contains a tiny drop of water. When it is heated, the water expands causing the kernel to explode and flip inside out. Most US popcorn is grown in Nebraska and Indiana, and increasingly in Texas.

2 Native Americans first discovered popcorn thousands of years ago in Guatemala or Mexico. It was popped in China during the Song Dynasty (960-279), as well as, in Sumatra and India long before Columbus reached the Americans.

3. In 1519 when he invaded Mexico, Spanish Conquistador Hernando Cortes first saw popcorn when he met the Aztecs. Popcorn was important to the Aztecs as food, as decoration for ceremonial headdresses and necklaces, and as ornaments on statues of their gods. Around 1612, French explorers around the Great Lakes met Iroquois, who used heated sand in a pottery vessel to make popcorn. There is an unproven theory that an Indian named Quadequina brought a deerskin bag of popped corn for the first Thanksgiving feast. In 1948 and 1950, anthropologist Herbert and botanist Earle Smith discovered ears of popcorn in the Bat Cave of west central New Mexico. The ears

measured from smaller than a penny to about 2 inches. They were determined to be about 5,600 years old.

4. Colonial housewives served popcorn with sugar and cream for breakfast. Some colonists used a cylinder of thin sheet-iron that revolved on an axle in front of the fireplace to make popped corn.

5. In 1885, Charles Cretors of Chicago, Illinois, invented the first popcorn machine. Street vendors were soon pushing steam or gas-powered poppers through fairs, parks and public exhibitions.

6. Today much of the popcorn you buy at movies and fairs is popped in machines manufactured by the Creators family.

7. Americans eat more than 17 billion quarts of popcorn a year, an average of 60 quarts per person per year. As a result of an elementary school project, popcorn became the official state snack food of Illinois. January 19 is National Popcorn Day, and October is National Popcorn Month.

2. Read the following text. 10

(1) India is a country of many languages. The constitution recognizes 22 languages officially, but over 121 unique languages have been identified in the country.

(2) To preserve and encourage the literary function of language, the government introduced 'classical languages' in 2004. According to the Ministry of Culture, a classical language is one that is at least 1,500 years old and has ancient, valuable literature recorded in it. Further, such a language is original and not derived from another language. Based on these guidelines, six languages have been classified as classical languages: Tamil, Sanskrit, Kannada, Telugu, Malayalam and Odia.

(3) The following graph shows the percentage of Indian people whose mother tongue is a classical language. This is as per data collected by the census of 2011. The census was not conducted in 2021 due to the pandemic.

(4) According to the graph, around 6.7% of the Indian population are native speakers of Telugu, whereas Sanskrit has been identified as a mother tongue by only 0.002% of the population, which is around 24,821 people. Malayalam has the second lowest number of native speakers, making up about 2.9% of Indians.

(5) The 2011 census data also noted that a majority of the native speakers reside in the area that their mother tongue originated from. For example, 93% of Kannada speakers live in Karnataka. Similarly, 93% of Malayalam speakers live in Kerala.

(6) Balancing preservation of culture and inclusivity is a delicate equation for a heterogeneous country like India. With growing awareness, concepts like 'classical languages' may help us achieve harmony.

Answer the following questions, based on the passage above

(i). Which of these pieces of information can be confirmed by reading the passage? **1**

- (I) the number of people in India who speak Tamil
- (II) where the majority of native Sanskrit speakers live
