END PLASTIC POLLUTION

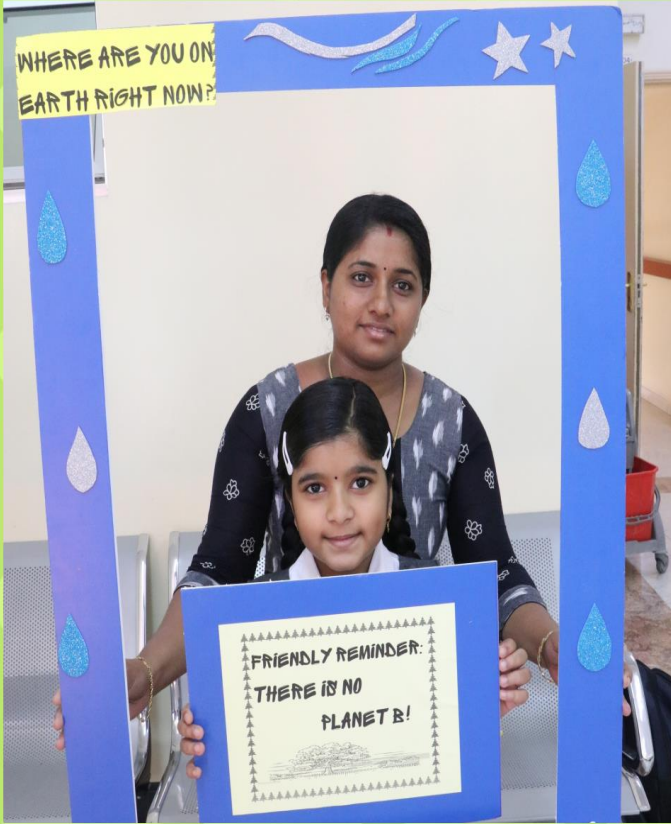

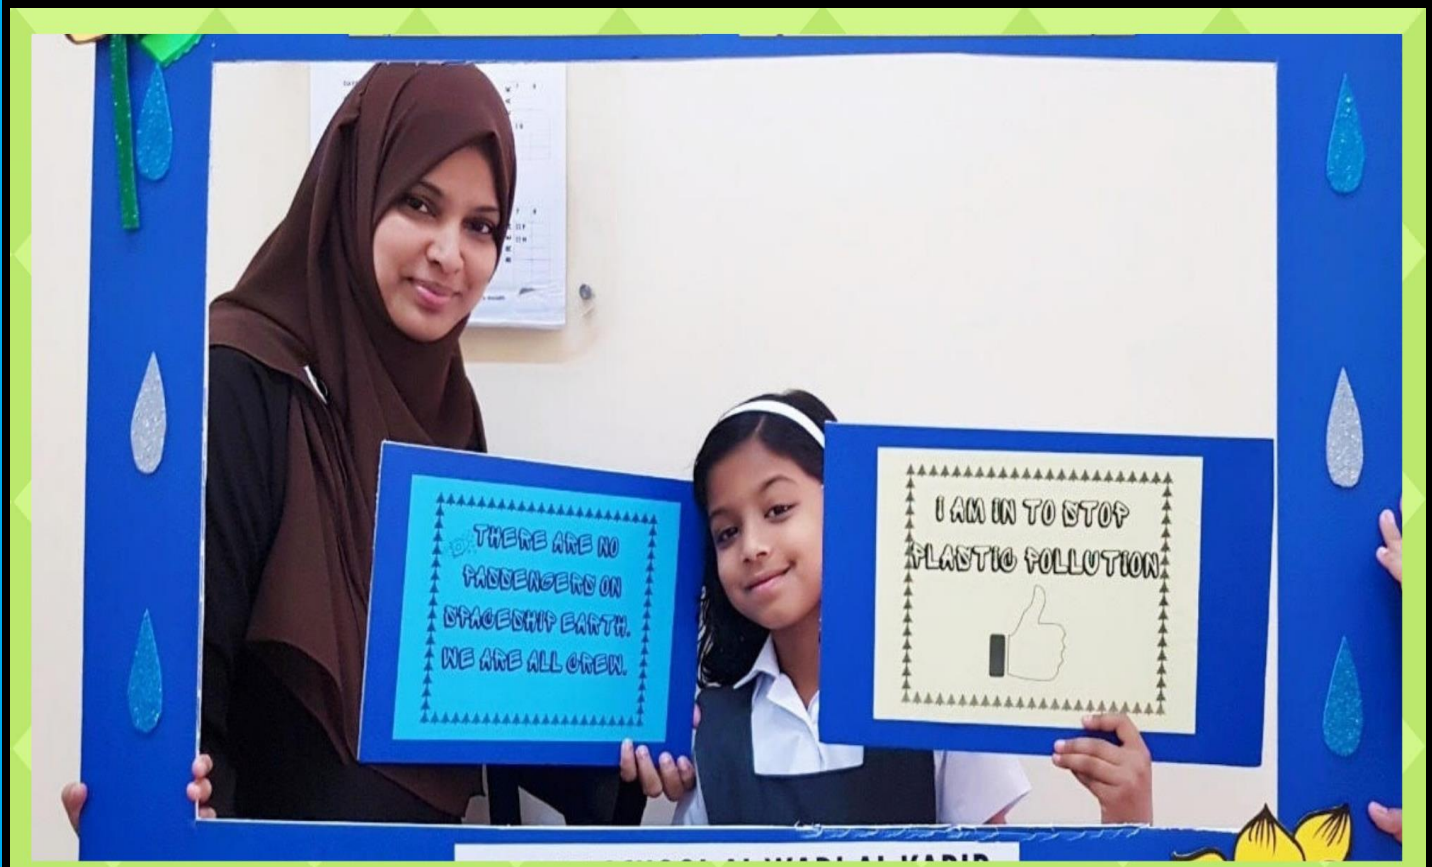

With a view to creating an awareness in students of various environmental facts as well as issues, we have been from time to time conducting several activities that create not only great interest in students but also motivate them to contribute meaningfully towards environmental conservation. The start of this academic session saw the celebration of the Earth Day on April 22nd 2018. The theme for Earth Day 2018 is to End Plastic Pollution, including creating support for a global effort to eliminate primarily single-use plastics along with global regulation for the disposal of plastics. From poisoning and injuring marine life to the ubiquitous presence of plastics in our food to disrupting human hormones and causing major life-threatening diseases, the exponential growth of plastics is threatening our planet's survival. JSWK voiced solidarity over protection and preservation of the planet, with emphasis on reduction of plastic use and adopting a sustainable lifestyle. We celebrated the natural beauty of our planet and reminded the young minds of what we can do to keep it healthy. We're glad that parents too were part of the celebration.
