

The presentation was aimed at:

- Creating an awareness in children of the counselling department in school and its functioning.
- Informing students of how they can assist in helping students who are differently abled.
- Students knowing the ways in which counseling can help them.
- Different brain activity games like the brain gym and breathing exercises were carried out.

The program was very interactive, fun filled and was well received by the students of all the grades.

Orientation Program on counseling for parents was held on April 22 2017

The program emphasized on the areas and problems that need to be focused upon to identify special children and slow learners. The support offered by the school counselors to help the children overcome the deficiencies and counseling protocol/functionality was explained. The school counselors contacts were shared.
