Q. I	Read the passage below and answer the questions that follow: <i>The Power of Sympathy</i> 1. Why do we feel a pang of sorrow when we see a stranger crying, or an urge to comfort a friend who has lost something dear to them? This natural response is called sympathy, and it has played a crucial role in human survival and social life for thousands of years. 2. Sympathy is often confused with empathy, but the two are not quite the same. Empathy is the ability to feel <i>with</i> someone – to actually share in their emotional experience as if it were your own. Sympathy, on the other hand, is feeling <i>for</i> someone – recognising their pain or difficulty and responding with concern, without necessarily experiencing the emotion yourself. When you see a news report about a natural disaster in a distant country and feel sorrow for the victims, that is sympathy at work. 3. Charles Darwin believed that sympathy evolved because it benefited early human communities. Groups whose members cared for the sick, shared food with the hungry, and comforted the grieving were more likely to survive and thrive than groups who did not. In this sense, sympathy is not simply a soft emotion but a practical tool that strengthened the bonds holding early societies together. 4. Psychologists have identified several factors that influence how much sympathy a person feels. One is similarity – people tend to sympathise more easily with those they see as similar to themselves, whether in appearance, background, or circumstances. Another is proximity, both physical and emotional; a tragedy affecting someone close to us usually stirs more sympathy	10 Marks

than one affecting a stranger far away. This explains why local news stories sometimes move us more than reports of larger tragedies overseas – a phenomenon researchers call "psychic numbing," where the sheer scale of distant suffering can make it feel abstract rather than real.

5. Sympathy also has a darker side. Adam Smith, the eighteenth-century philosopher, warned that unchecked sympathy could lead to poor decisions if it caused people to act on impulse rather than reason. He argued that a balance between feeling and judgement is necessary. Similarly, modern charities have learned that sympathy alone does not guarantee effective help; donors sometimes give generously to emotionally compelling stories while ignoring causes that are equally worthy but less emotionally striking.

6. Despite its complications, sympathy remains one of the most valuable threads in the fabric of human relationships. It draws people together, inspires acts of kindness, and reminds us that we are, fundamentally, social creatures who depend on one another.

A. Multiple Choice Questions:

1. According to the passage, sympathy means:
a) Sharing someone's emotion as your own
b) Feeling *for* someone without experiencing their emotion yourself
c) Ignoring another person's pain
d) Feeling nothing towards a stranger
2. Who warned that unchecked sympathy could lead to poor decisions?
a) Charles Darwin
b) Adam Smith
c) A modern charity worker
d) A news reporter
3. What term is used for the phenomenon where large-scale distant suffering feels abstract rather than real?
a) Emotional distance
b) Psychic numbing
c) Sympathy fatigue
d) Moral blindness
4. According to Darwin, sympathy evolved because it:
a) Made people weaker
b) Benefited early human communities and aided survival
c) Had no real purpose
d) Only existed in modern societies

B. Short Answer Questions:

5. Name two factors that psychologists say influence how much sympathy a person feels.

Q. II.	Read the passage below and answer the questions that follow: <i>The History of Graffiti</i> 1. The first drawings on walls appeared in caves thousands of years ago. Later, the Ancient Romans and Greeks wrote their names and protest poems on buildings. Modern graffiti seems to have appeared in Philadelphia in the early 1960s, and by the late sixties it had reached New York. The new art form really took off in the 1970s, when people began writing their names, or 'tags', on buildings all over the city. In the mid-seventies, it was sometimes hard to see out of a subway car window, because the trains were completely covered in spray paintings known as 'masterpieces'. 2. In the early days, the 'taggers' were part of street gangs who were concerned with marking their territory. They worked in groups called 'crews', and called what they did 'writing' – the term 'graffiti' was first used by <i>The New York Times</i> and the novelist Norman Mailer. Art galleries in New York began buying graffiti in the early seventies. But at the same time that it began to be regarded as an art form, John Lindsay, the then mayor of New York, declared the first war on graffiti. By the 1980s, it became much harder to write on subway trains without being caught, and instead many of the more established graffiti artists began using roofs of buildings or canvases. 3. The debate over whether graffiti is art or vandalism is still going on. Peter Vallone, a New York city councillor, thinks that graffiti done with permission can be art, but if it is on someone else's property, it becomes a crime. 'I have a message for the graffiti vandals out there,' he said recently. 'Your freedom of expression ends where my property begins.' On the other hand, Felix, a member of the Berlin-based group Reclaim Your City, says that artists are reclaiming cities for the public from advertisers, and that graffiti represents freedom and makes cities more vibrant. 4. For decades, graffiti has been a springboard to international fame for a few. Jean-Michel Basquiat began spraying on the street in the 1970s before becoming a respected artist in the '80s. The Frenchman Blek le Rat and the British artist Banksy have achieved international fame by producing complex works with stencils, often making political or humorous points. Works by Banksy have been sold for over £100,000. Graffiti is now sometimes big business.	10 Marks
