I. Identify and pick out the words that are contracted from the paragraph and write the full form of the same in the space given below.

You don't usually see many groundhogs in the winter. That's because a groundhog hibernates (type of deep sleep) in its underground burrow until spring. Its hibernation habits gave rise to the custom of Groundhog Day. Legends say that if a groundhog doesn't see his shadow, we'll have an early spring. That means we wouldn't have to go through a long winter. Even though this is a fun tradition, the fact is that groundhogs can't really predict the weather, so it's a good idea to still get your weather updates from the news.
