

# INDIAN SCHOOL AL WADI AL KABIR

DEPARTMENT OF MATHEMATICS (2023-2024)

TOPIC: DIVISION

RESOURCE PERSON: Ms. FLAVIA CASTELINO

WORKSHEET

NAME: \_\_\_\_\_ CLASS: IV SEC: \_\_\_\_\_ DATE: \_\_\_\_\_

**Read the instructions and do as directed.**

**I. Read the questions carefully. Circle the correct answer.**

- The answer in division is called the \_\_\_\_\_.  
(a) Product                      (b) Quotient                      (c) Dividend                      (d) Difference
- We cannot divide a number by \_\_\_\_\_.  
(a) Zero                      (b) 1                      (c) the number itself                      (d) 999
- If 8 pens cost ₹ 72, the cost of 1 pen is ₹ \_\_\_\_\_.  
(a) 576                      (b) 9                      (c) 80                      (d) 720
- When 70 is divided by 8 the remainder is  
(a) 0                      (b) 2                      (c) 4                      (d) 6

**II. Without actual division, find the Quotient and the Remainder for each of the following.**

|     |                 | Quotient | Remainder |
|-----|-----------------|----------|-----------|
| (a) | $396 \div 10$   |          |           |
| (b) | $396 \div 100$  |          |           |
| (c) | $3096 \div 100$ |          |           |
| (d) | $3090 \div 10$  |          |           |

**III. Fill in the blanks with the correct answer.**

1. If  $12 \times 5 = 60$ ; then  $60 \div 12 =$  \_\_\_\_\_
2. If the divisor = 9, quotient = 7, remainder = 2 then the dividend = \_\_\_\_\_
3. When a number is divided by itself, the quotient = \_\_\_\_\_
4.  $3500 \div 35 =$  \_\_\_\_\_
5. \_\_\_\_\_  $\div 20 = 20$
6. If 2,800 sweets are equally packed in 28 boxes, then each box contains \_\_\_\_\_ sweets.

**IV. Match the following columns.**

|    | <b>Column A</b> |     | <b>Column B</b> |
|----|-----------------|-----|-----------------|
| 1. | $425 \div 1$    | (a) | 65              |
| 2. | $65 \div 65$    | (b) | 93              |
| 3. | $130 \div 2$    | (c) | 1               |
| 4. | $930 \div 10$   | (d) | 30              |
| 5. | $900 \div 30$   | (e) | 425             |

**Working space:**

**Answer: 1.** \_\_\_\_\_ **2.** \_\_\_\_\_ **3.** \_\_\_\_\_ **4.** \_\_\_\_\_ **5.** \_\_\_\_\_

**V. Rekha divided 648 by 47 and got  $Q = 13$  and  $R = 37$ . Check if she got the correct answer or not.**

---

---

---

---

---

---

---

**VI. Divide and check your answer.**

$$4796 \div 19$$

|  | <b><u>Checking</u></b> |
|--|------------------------|
|  |                        |

**VII. Solve the following story sums.**

1. For the school excursion, one teacher was allotted to care for a group of 23 children. How many teachers were required if 276 children went on the excursion?

|  |  |
|--|--|
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

2. There are 3825 stickers in 5 boxes. If each box contains the same number of stickers, how many stickers does each box have?

|  |  |
|--|--|
|  |  |
