3. to kill insects in fields: _____ :: to scare away birds ::scarecrow.
4. to destroy weeds in the field: weedicides:: to kill pests in field: _____.

II. Write the correct version of the statements given below.

1. Farmers use manure and fertilisers to destroy weeds.

2. The process of separating grains from harvested crop is called irrigation.

3. A sickle has a funnel-shaped opening to long tube that are attached to the plough.

III. Select the correct answer to these questions from the codes (i), (ii), (iii) and (iv) as given below –

- i) Both A and R are true and R is the correct explanation of the assertion.
- ii) Both A and R are true but R is not the correct explanation of the assertion.
- iii) A is true but R is false.
- iv) A is false but R is true.

1. **Assertion:** The seeds of chillies are first sown in nurseries and then transferred to the field.

Reason: They have already developed roots and other systems are stronger, making them less vulnerable to outside conditions.

Answer: _____

2. **Assertion:** Farmers put up scarecrows to scare away birds.

Reason: The process of cutting mature crop plants is called harvesting.

Answer: _____

IV. Name the tool shown in the picture and mention its use.

V. Application based questions.

1. Ramesh owns a small farm. He was able to grow crops on it. He made a small fortune and is now looking to expand his business. He wants to buy more land, adjacent to his farm but he is concerned about how his crops will be watered regularly. Can you suggest some different ways in which this is possible? Give reasons why this is important as well.

2. Mohan's crop harvest was spoilt due to improper storage of grains. He contacted the local Department of Agriculture to help him for the next year. What suggestions do you think they must have given Mohan?

VI. Illustrate your favourite harvest festival of India.
