

**I. Match the following.**

Column A		Column B	
1.	water hyacinth	a.	drink water from ponds, lakes
2.	desert snake	b.	germination
3.	wild animals	c.	need less water
4.	young plant	d.	spines
5.	cactus	e.	aquatic plant
1. _____ 2. _____ 3. _____ 4. _____ 5. _____			

**II. Answer the following questions.**

1. Do all animals need the same amount of water? Give a reason to support your answer.

---

---

---

---

2. What are aquatic animals? Name the rare aquatic animal that we can see in Muscat (Bandar Al Khayran) in their natural habitat.

---

---

---

3. What helps a camel to survive in the desert? Give other examples of desert animals.

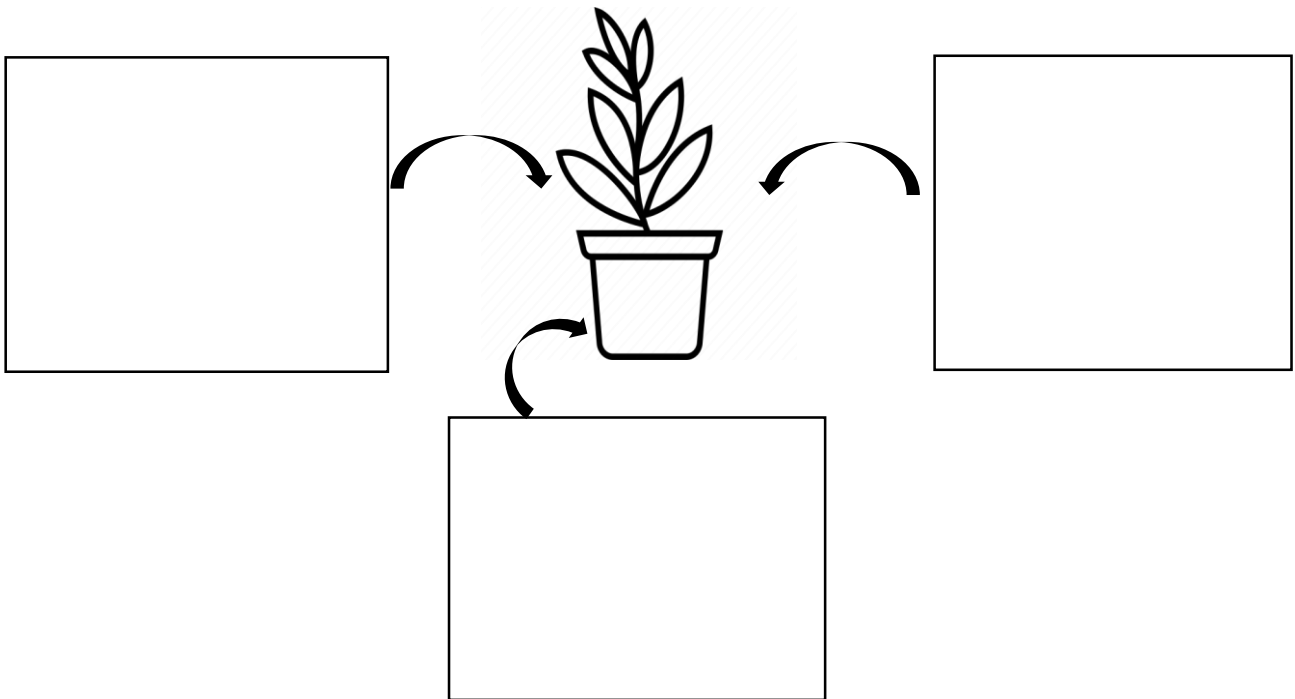

---

---

---

---

4. Sophy's mother told her that plants can make their own food. Help Sophy to keep her plant healthy by drawing all what a plant needs to make its food. Label them.

5. Reena went on a desert camp to Wahiba Sands. The beautiful Wahiba Sands lie in the heart of Oman. It was 46°C outside, so they turned on the air conditioning. Only few animals and plants can survive in this place, because water is very less in this region. Draw an animal and a plant that can survive in a desert in the space given below. Label it.

Desert Animal	Desert Plant
