

INDIAN SCHOOL AL WADI AL KABIR

DEPARTMENT OF MATHEMATICS (2024-2025)

TOPIC: DIVISION

WORKSHEET

RESOURCE PERSON: Ms. SOUMYA L S NAIR

NAME: _____ CLASS: IV SEC: _____ DATE: _____

Read the instructions and do as directed.

Q1. Read the questions carefully. Solve them if required, and then fill in the blanks with the correct answers.

- a. The answer in division is called the _____.
- b. When a number is divided by itself, the quotient is _____.
- c. When 60 is divided by 7, the remainder is _____.
- d. _____ $\div$ 10 = 90
- e. There are _____ weeks in 84 days.
- f. If $16 \times 7 = 112$, then $112 \div 7 =$ _____.
- g. If 10 ice creams cost ₹ 120, one ice cream will cost ₹ _____.
- i. $600 \div 6 =$ _____.

Q II. Without actual division find the quotient and the remainder for each of the following and write in the space provided.

	Quotient	Remainder
$2578 \div 100$		
$3286 \div 10$		
$965 \div 100$		
$4000 \div 100$		
$3289 \div 10$		

QIII. Find the quotient and the remainder and check your answer.

$847 \div 12 =$

Check

Q IV. Divide and find the Quotient and Remainder.

a. $2249 \div 6$

b. $512 \div 16$

Q IV. Solve the following word problem.

Rohan has 156 chocolates. He wants to distribute them equally among 8 of his friends. How many chocolates will each friend get? Will Rohan be left with any chocolates for himself?
