ז ו	In the following question, a statement of assertion(A) is followed by a statement of reason(R).
	Mark the correct choice:
	Assertion (A): Even though only the southern part of India lies in the tropical region, almost the
	whole of India experiences a tropical climate.
	Reason (R): The Himalayan mountains act as a barrier and prevent the northerly cold winds from entering India.
	A) Both A and R are true and R is the correct explanation of A
	B) Both A and R are true but R is not the correct explanation of A
	C) A is true but R is false
	D) A is false but R is true
D 4	Answer the following questions: -

	 Ans: India has large east-west extent, about 30° of longitude So, there is a time difference of 2 hours between Gujarat and Arunachal Pradesh. To avoid the difficulties due to the time difference India decided to have a standard time 82°30'E has been selected, because it passes through the center of the country. (Mirzapur, UP)
14	'Mountain passes have been helpful to India since historic times' Explain. Ans: India is bounded by the young fold mountains in the northwest, north and northeast. The various passes across the mountains in the north have provided passages to the ancient travelers. The spices, muslin and other merchandise' were taken from India to different countries through these passes. Mountain passes have contributed in the exchange of ideas and commodities since historic times.
15	What is latitude? What is the latitudinal extent of India?
	Ans:
	• The position of a place, measured in degrees north or south of the Equator. It is mostly
	 calculated because of angular distance of a place north-south of the equator, The main land of India extends between latitudes 8°4′ N and 37°6′ N.
	 The latitudinal extension shows that India is located in the Northern Hemisphere.
16	What is the name of the southernmost point of India? Why is it not visible today? Ans:
	 The southernmost point of India is Indira Point. The Indira point is situated in the Great Nicobar Group of Island in Andaman Nicobar island. It is not visible today, because it was submerged under the sea water in 2004 Tsunami.
