I. Vertical Addition -2 digit with 2 digit (double digit with double digit).

When adding 2 – digit with 2 digit always add the digit in the ones place first.

| a.	4	2
+	3	1

b.	2	6
+	1	3

C.	3	5
+	2	2

d.	1	4
+	2	4

e.	5	0
+	2	1

To add on the number line, we jump forward.

$6 + 1 = \boxed{7}$

Start from 6, take 1 jump forward, you will reach 7.

PROPERTIES OF ADDITION:

1. When you add 0 (zero) to a number, the answer is the same numbers.

Examples:

$5 + 0 = 5$ $3 + 0 = 3$

2. When we add 1 to a number, the answer is the number that comes after it.

2 FLOWERS   +   1 FLOWER   =   3 FLOWERS

3. When two numbers are added in any order. The answer remains the same.

Examples: $2 + 3 = 5$

$3 + 2 = 5$
