3. Can you think of creating a shape that would give a circular shadow if held in one way and a rectangular shadow if held in another way?

Ans: Yes, When the top of the cylinder faces the Sun, then a circular shadow is formed. On the other hand, when the side of the cylinder faces the Sun, then a rectangular shadow is formed.

4. In a completely dark room, if you hold up a mirror in front of you, will you see a reflection of yourself in the mirror?

Ans: The image of an object is formed when light is reflected from the mirror. Since there is no source of light in the room, no image will be formed.
