TOPIC: ARTICLE WRITING

HANDOUT

RESOURCE PERSON: Farah Dalal

NAME: _____ CLASS: V SEC: ____ DATE: _____

An article

- it is a piece of writing usually intended for publication in a newspaper, magazine or journal
- is written for a wide audience, so it is essential to attract and retain the readers' attention
- may include amusing stories, reported speech and descriptions
- can be formal or informal, depending on the target audience
- should be written in an interesting or entertaining manner
- should give opinions and thoughts, as well as facts
- is in a less formal style than a report

An article can

- describe an experience, event, person or place
- present an opinion or balanced argument
- compare and contrast
- provide information
- offer suggestions
- offer advice

A realistic article should consist of:

- an eye-catching title which attracts the readers' attention
- an introduction which clearly defines the topic to be covered.
- the main body in which the topic is further developed in detail.
- the conclusion - summarizing the topic or a final opinion, recommendation or comment.

Grow More Trees to Reduce Pollution
By: Sreeja/Thomas

"Trees are poems the earth writes upon the sky."
Growing more trees is a vital strategy to combat pollution and enhance our environment. Trees absorb carbon dioxide, a key greenhouse gas, while releasing oxygen, essential for life. In urban areas, where air quality often suffers, increased greenery can significantly improve conditions by filtering out dust, smoke, and other pollutants, leading to cleaner air. Moreover, trees help mitigate noise pollution by acting as natural sound barriers and provide shade, which can lower temperatures and reduce energy consumption from air conditioning. Community tree-planting initiatives not only improve local ecosystems but also strengthen community bonds, fostering a sense of shared responsibility for our planet. By raising awareness and encouraging individuals to plant trees, we can collectively address pollution and contribute to a more sustainable future. In the face of climate change, planting trees is a straightforward yet impactful action we can all take to create a cleaner, greener world for generations to come.
